

Nex.Return Bookdrop

Secure, vandal resistant, online check-in and receipt

The Nex.Return Bookdrop is designed to be an asset to your library. Behind its clean and simple façade is a round-the-clock, fully automated return chute with RFID and SIP2 checkin for multiple items. It provides item safety and patron convenience. Simply unlock the flap by presenting a valid library item, drop in the books and go, its that easy.

- Stainless steel construction**
 The unit is made from exterior grade stainless steel for durability, vandal protection and corrosion resistance.
- Tamper proof fittings**
 Used for securing the bookdrop in position
- Rear Cover Protection**
 The design of the chute prevents direct line of sight into the library and keeps out drafts
- Compact size**
 The wall cutout required for installation is only 490mm x 328mm
- Open Alarm**
 If the bookdrop is left open the system emits an audible alarm.

The Nexbib Nex.Return Bookdrop gives patrons the ability to return library items at any time of the day or night. Designed to be vandal resistant and highly durable, the bookdrop requires a valid library item to be scanned in order to unlock the flap.

- Multiple items can be returned at a time, speeding up the returns process and putting an end to returns queues
- Patrons will have their items checked back in instantly and the security status of the RFID tag will be updated automatically.
- Coloured Indicator LEDS guide the patron through the returns process and staff access via an administration card makes maintenance quick and easy.
